

NEW!

Voice, Data, Video & Fiber Optic Cabling

Get Started on your career! Do you want to pursue a career in cabling and gain working knowledge of how commercial and residential buildings are wired?

South Suburban College is pleased to announce a new addition to its Networking and Construction classes.

This course will focus on industry standards for types of media and cabling, physical and logical networks and signal transmission. Students will develop skills in pulling cable, mounting and wire management, identifying wiring closets, patch panel installation and termination, installation of jacks and testing cables. This course will stress design, documentation and installation issues and cover safety and work and work group environments. This class will help prepare students for the BICSI Registered Installer, Level 1 exam, and fiber installation and testing.

Learn by "doing" - You will have hands-on activities with lab-based learning!

**Our new classes are running both weekdays and Saturday!
