

Microsoft Vista & Office 2007

MIS 110 or 190

Are you ready for Microsoft's new Vista & Office 2007?

Is your employer changing over to Office 2007?

South Suburban College will offer classes on the latest release of Microsoft Windows Vista and the new Microsoft Office 2007 Suite this fall. Make sure you're on the cutting edge of the technology and one of the first to upgrade your skills to these new Microsoft Systems.

Find out what Vista and Office 2007 are all about.

Network Security

MIS 213 or CIS 296

Learn the fundamentals of computer security as you build, test, and deploy a secure network.

In this hands-on course you will learn how to apply security best practices to actual security architectures. Labs will cover Communication Security, Infrastructure Security, Cryptography and Operational Security.

NEW! Cisco IT Essentials I v4.0 & Network +

CIS 132

CIS 180

CompTIA A+ / Net+ Prep

Get started on your IT career. Do you want to pursue a career in IT and gain working knowledge of how computers work, how to assemble computers, how to troubleshoot hardware and software issues?

South Suburban College and Cisco are pleased to announce an update to the popular PC Hardware and Software course IT Essentials I, also known as A+ training prep. Learn how to repair, install, and maintain PC's; learn how to setup a network operating system. These courses cover new information, align with the new certifications of CompTIA A+/Net+, and include virtual learning tools to help students become familiar with the components of desktop, laptop computers, and how to manage network servers.

These courses provide you with the knowledge and skills necessary to prepare for the CompTIA A+/Net+ exam. The new course version includes laptops and portable devices, wireless connectivity, security, safety and environmental issues, and communications skills.

Learn by doing - You will have hands-on activities with hardware and virtual lab-based learning to become familiar with various hardware and software components. Discover the best practices in maintenance and safety.

Our new classes are running at both campuses now. Get started with your career in IT!

NEW! Cisco CCNA-Exploration
CIS 120, 125, 220 & 225

CCNA Exploration offers in-depth theory, challenging labs and detailed lessons. The course prepares students to be successful IT professionals in small-to-medium businesses as well as enterprise and service-provider environments.

Advantages of the new CCNA Curricula:

- Improve accuracy and flow of information, with less redundancy
- Increased use of rich media for ongoing interactivity throughout the learning process
- Optimal balance of theory, practice and application
- Alignment of learning objectives with job skills
- Enhanced and embedded network simulation tool for e-doing, which provides guidance and opportunities for exploration and experimentation. Our new e-doing will enable you to complete interactive activities that stimulate learning and improve knowledge retention
- High and low bandwidth class online class delivery

Then CCNA Exploration curriculum is composed of four courses:

1. Network Fundamentals
2. Routing Protocols and Concepts
3. LAN Switching and Wireless
4. Accessing the WAN

Get on the fast track with your career – each course is only 8 weeks!

NEW! Cisco-Fundamentals of Wireless LANs
CIS 227

South Suburban College is happy to announce a new addition to the Cisco Academy Program! Our New Cisco curriculum Fundamentals of Wireless Networks is equipped with the latest in hardware from Cisco.

Businesses are becoming increasingly dependent on wireless technology to perform their day-to-day business activities. Wireless LANs offer users flexibility and expansion of the IT infrastructure. The immense potential of this new technology is a sure sign that the need for Wireless Specialists will grow in the coming years. The Fundamentals of Wireless LANs course will teach you to develop, implement and troubleshoot wireless networks. This hands-on course will advance your career path by focusing on the practical skills needed to develop, plan, implement, operate and troubleshoot a wireless network. It will train you on best practices in the field of technology and security.

By attending the course you will have the opportunity to prepare for the Cisco Wireless LAN Support Specialist (WLANFE) certification exam.

Add another certification to your resume! The future is Wireless!

Voice, Data, Video & Fiber Optic Cabling

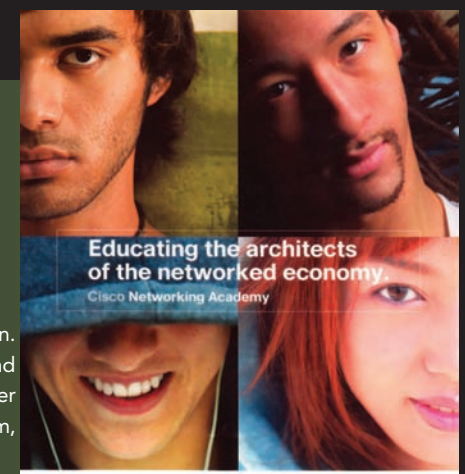

CIS 130

Get Started! on your career. Do you want to pursue a career in cabling and gain working knowledge of how commercial and residential buildings are wired?

South Suburban College is pleased to announce a new addition to its Networking and Construction classes.

This course will focus on industry standards for types of media and cabling, physical and logical networks and signal transmission. Students will develop skills in pulling cable, mounting and wire management, identifying wiring closets, patch panel installation and termination, installation of jacks and testing cables. This course will stress design, documentation and installation issues and cover safety and work and work group environments. This class will help prepare students for the BICSI Registered Installer, Level 1 exam, and fiber installation and testing. Learn by "doing" – You will have hands-on activities with lab-based learning!

Our new classes are running both weekdays and Saturday! Get started with your cabling career! **Register Now!**
