

NEW!

Cisco Fundamentals of Wireless LANs

South Suburban College is happy to announce a new addition to the Cisco Academy Program! Our New Cisco curriculum Fundamentals of Wireless Networks is equipped with the latest in hardware from Cisco.

Businesses are becoming increasingly dependent on wireless technology to perform their day-to-day business activities. Wireless LANs offer users flexibility and expansion of the IT infrastructure. The immense potential of this new technology is a sure sign that the need for Wireless Specialists will grow in the coming years. The Fundamentals of Wireless LANs course will teach you to develop, implement and troubleshoot wireless networks. This hands-on course will advance you on a career path by focusing on the practical skills needed to develop, plan, implement, operate and troubleshoot a wireless network. It will train you on best practices in the field of technology and security.

By attending the course you will have the opportunity to prepare to take the Cisco Wireless LAN Support Specialist (WLANFE) certification exam.

Add another certification to your resume! The future is Wireless!

Register today at South Suburban College!
